Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2612

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Unexamined Patent Publication No. 123911/ 1999 ('911) in view of Schultz et al.

'911 describes a method of detecting and alarming a decrease in internal air pressure of tires attached to a vehicle comprising a step of setting a threshold value for alarming a decrease in tire air-pressure based on a type of the tires (winter, summer), after determining the type of the tires automatically, except for specifically stating that a driver designates a type of tire from a display.

Schultz discloses a vehicle tire pressure system comprising display means (Fig. 3) for allowing a user to designate a specific tire in use so that tire pressure is adjusted for the particular tire selected.

It would have been obvious to use a tire selection display as suggested by Schultz in conjunction with a tire threshold pressure warning system as suggested by '911, in order to allow an operator to more easily select which tires were in use on a vehicle, thus providing greater convenience in vehicles where tire changes were frequent.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Naito, Tuttle, Toyofuku, Yanase and Arita disclose tire monitoring systems.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brent A Swarthout whose telephone number is 571-272-2979. The examiner can normally be reached on M-F from 6:30 to 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Horabik, can be reached on 571-272-3068. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
